Sliding Fee Schedule for Services and Contribution Guidelines

The following charts inform you of the actual costs incurred in providing services to individuals. The charts serve as a guideline in determining our service fees and applicable income based fee schedules. This information also serves as a guideline for those who are able to partially contribute toward either the cost of their own services or for those who regularly give to support others who receive caregiver services through Aging Services for Communities.

Even though our volunteer drivers donate their time generously, we still have fixed costs to continue our program such as personnel, office rent and supplies, utilities, mileage reimbursement and insurance. This sheet will help you determine an appropriate amount to contribute for services if you are able and willing to do so.
All homemaking services are preformed by employed, bonded, insured, drug tested and background checked staff.
Thank you!

Sliding Fee Schedule for Services and Contribution Guidelines

Your annual income 1 person household is between	Your annual income 2 person household is between	
Level 1 \$ 0 and \$11,770	Level 1 \$ 0 and \$15,930	Refer to county workers.
